# ANNUAL REPORT

OF THE MEDICAL OFFICER OF HEALTH FOR THE  
FLAXTON RURAL DISTRICT COUNCIL  
FOR THE YEAR 1907.

---

TO THE CHAIRMAN AND MEMBERS OF THE FLAXTON  
RURAL DISTRICT COUNCIL.

Mr. Chairman and Gentlemen,

I have the honour of submitting for your consideration my Report for the year 1907:—

The area of the District is 30,309 acres.

The population, 6,924.

## BIRTH-RATE.

The births registered are 114, 58 males and 58 females; of these, 1 male and 3 females are illegitimate. The birth-rate is 16·4 per 1,000 per annum. This is the lowest rate we have had during the last twelve years. In 1906 it was 21·5, the average for the previous ten years was 19·2. The birth-rate for England and Wales for 1907 is 26·3.

## DEATH-RATE.

The deaths registered are 211, 100 males and 111 females. The death-rate is 30·4 per 1,000 per annum. For 1906 the rate was 23·2, and for the previous ten years the average was 21·4. Deducting the deaths occurring in the Public Institutions, and adding the deaths of residents registered in Public Institutions beyond the District, we get a total of 89 deaths, giving a rate of 12·8. It will thus be seen that this exceptionally high death-rate was due to the increased number of deaths in the Public Institutions. The death-rate for England and Wales is 15·0. The Zymotic death-rate for residents is 6·0. The infantile mortality per 1,000 births registered is 72. For 1906 it was 82. England and Wales for 1907 is 118.

## CAUSES OF DEATH DURING THE YEAR 1907.

There were 89 deaths, as follows (these do not include the deaths in the Public Institutions):—Diphtheria, 1; Influenza, 2; Diarrhoea, 1; Phthisis, 3; other Tubercular Diseases, 2; Cancer, 7; Bronchitis, 4; Pneumonia, 4; other Diseases of Respiratory

Organs, 1; Premature Birth, 3; Heart Diseases, 19; Accidents, 4; Suicides, 1; all other causes, 37.

For the Flaxton locality there were 30 deaths against 21 in 1906.

For the Dunnington locality there were 15 against 27 in 1906.

For the Skelton locality there were 36 against 23 in 1906.

North Riding Asylum, 122 against 78; Fever Hospital, 8 against 12 in 1906.

### CASES OF INFECTIOUS DISEASE NOTIFIED DURING THE YEAR 1907.

There were 54 against 25 in 1906:—Diphtheria, 10; Erysipelas, 4; Scarlet Fever, 34; Enteric Fever, 6.

The past year has been one in which we have had a large increase of Notifiable Infectious Disease. During the first three months we had 2 cases of Erysipelas and 1 of Enteric Fever notified, but from the beginning of April to the end of the year we were never free from infectious disease—July, August, and September were the chief months. On August 31st I wrote a special report to the Local Government Board on an outbreak of Scarlet Fever at Strensall. We had of this disease 34 cases, and of Diphtheria, 10. Several times, when isolation accommodation was badly needed, the York Fever Hospital was closed to us on account of the number of City cases. I must say, however, that Dr. Smith, the City Medical Officer of Health, accommodates us most willingly whenever it is possible for him to do so.

SCARLET FEVER.—There were no deaths. The Fever, on the whole, was exceedingly mild, and largely on that account parents did not take that care in isolating that was necessary. One man, at Strensall, we were compelled to summons, and at the Bulmer East Petty Sessions he was fined 10s. He had allowed his children, after being twice warned by the Inspector, to mix with other children, and to convey milk to several houses. In this way four other families were affected.

The origin of the outbreak at Strensall was, after careful and persistent enquiry by the Inspector and myself, traced to East Dereham, Norfolk. This was confirmed by a letter received from the Medical Officer of Health of that District.

Nineteen cases were reported from Strensall, 4 from Osbaldwick Lane (which had probably been imported from Fulford), 3 at

Haxby (no definite history as to origin), 1 at Lilling (contracted at Sheriff Hutton), and 5 at the North Riding Asylum. Here the Fever was clearly traced to a patient from Prestwich Infirmary, who was admitted into the Asylum on April 9th, and on May 1st was found peeling. 27 of the 34 were under 15 years of age, and 7 were adults. Apart from the North Riding Asylum, 14 different families were affected. All were visited by the Inspector, and the majority by myself. Minor nuisances found at the houses and premises were at once abated.

ENTERIC FEVER.—6 cases. Five of the 6 were adults, the other was a boy, aged 12 years. One occurred at Haxby, in October. I could trace no definite cause of the outbreak, although on examining the drinking water I found it contaminated with sewage, and advised the laying on of the York water. The 5 others resided at the North Riding Asylum, and were isolated at that Institution. The drainage system, which was recently under repair, has most probably been the cause of the outbreak.

DIPHTHERIA.—10 cases. Eight of these were notified from Wigginton, and 2 at Haxby, 9 children and 1 adult being affected. One, a child 9 years of age, at Wigginton, proved fatal. The first case was reported in August, the others occurred irregularly to the end of the year. On August 6th, and again on November 19th, along with the Inspector, I visited Wigginton and Haxby. There was no connection traceable between the outbreaks in the two villages. Insanitary conditions were found which were sufficient to account for the origin of the disease. In one instance there was an insanitary cesspool; at another house a drain was choked up; and in others uncemented ashpits and privies. There was no means of proper isolation at home, and, the Fever Hospital being closed to us, the disease spread by contact. The water, on being tested, was found, in the majority of cases, to be quite unfit for drinking purposes. It is essential that all the houses at Wigginton should have the York water now that it is laid on to the village. All the affected houses were visited by the Inspector, and nearly all by myself. The greatest care is always taken with regard to stoving and disinfecting of houses, bedding, &c. The "Alformant A" apparatus with Formalin is used in place of the sulphur candle, and is of great advantage in the fumigation of rooms in small cottages. The fumes of sulphur are so liable to be disagreeable to the rest of the household. The Schools, too, are always thoroughly stoved and disinfected after closure for infectious disease.

ERYSIPELAS.—Of the 4 cases notified, 2 occurred at the North Riding Asylum, 1 at Wigginton, and 1 at Buttercrambe. All were adults. Minor insanitary conditions found were at once remedied.

## WATER SUPPLY OF DISTRICT.

Nearly all samples of water taken from different parts of the District during the year have been found, on examination, to be contaminated with sewage. I trust that wherever possible the Council will have the York water laid on to their respective villages.

## VILLAGE SEWERAGE.

This is having the serious consideration of the Council, especially in regard to the villages of Strensall, Haxby, and Wigginton, and as early as possible a definite scheme will be prepared and, I hope, carried out.

## DAIRIES, COWSHEDS, &c.

Visits are systematically made every three or four months to every Cowshed and Dairy in the District. They are all registered, and are kept in a satisfactory sanitary condition.

## FACTORY AND WORKSHOPS ACT.

Registers are kept by the Council of Workshops and Outworkers. They are visited regularly by the Inspector, and any defects found are at once remedied.

## THE NEW EDUCATION ACT (Medical Inspection of School Children, &c.),

if properly carried out, should be the means of improving the health and general condition of school children, and be a great advantage to the future welfare of the country.

I am, Mr. Chairman and Gentlemen,

Your obedient Servant,

ALWYN RAIMES, M.D.,

Medical Officer of Health.

Mill Mount,

York, March 3rd, 1908.

## FLAXTON RURAL DISTRICT COUNCIL.

---

### INSPECTOR OF NUISANCES' ANNUAL REPORT FOR 1907.

Mr. Chairman and Gentlemen,

There have been 34 new houses erected in the District during the year.

I have made the usual inspections under the Dairies, Cow-sheds, and Milk Shops Order, and served 3 notices to remedy defects.

No notices have been served under the Factory Acts. The defective sanitary arrangements at a Brickyard were remedied on verbal request.

Eight notices, affecting 14 houses, have been served to provide a wholesome and efficient water supply; 1 notice (affecting 2 cottages), as to houses rendered unfit for habitation; 7 notices have been served as to defective drains; 1 notice has been served as to pail privy; 1 notice has been served as to foul ditch; 1 notice has been served as to pollution of stream; 1 notice has been served as to putrid matter.

The drainage of Strensall has, as in previous years, been subject matter for complaint. The District Council are making good progress with a definite scheme of drainage for that village.

I am, Gentlemen,

Your obedient Servant,

JAS. WHITE,

Inspector of Nuisances.

# VITAL STATISTICS OF WHOLE DISTRICT DURING 1907 AND PREVIOUS YEARS.

| Year.                         | Population estimated to middle of each Year. | Births.           |        | Total Deaths Registered in the District. |                                  |              |        | Total Deaths in Public Institutions in the District. | Deaths of Non-residents registered in Public Institutions in the District. | Deaths of Residents registered in Public Institutions beyond the District. | Net Deaths at all Ages belonging to the District. |        |

| 1907                          | 6,924  | 114               | 16.4   | 9  | 1.2 (72)                         | 211          | 30.4   | 130  | 9  | 89   | 12.8  |        |

\* The rates in these columns are calculated per 1,000 of estimated population.

Area of District in acres (exclusive of area covered by water), 30,309.

Total population at all ages, 6,924 ; number of inhabited houses, 1,225 ; average number of persons per house, 5—at Census of 1901.

Institutions within the District receiving sick and infirm persons from outside the District.  
 York Fever Hospital.      York Smallpox Hospital.  
 North Riding Asylum.

Institutions outside the District receiving sick and infirm persons from the District.  
 York County Hospital.  
 York Union Workhouse.

Is the Union Workhouse within the District ?    No.
